

Gola sottotop

Gola con profilo scavato incassata nel fianco. La gola può essere facilmente posizionata o rimossa anche dopo il montaggio del top.

Main groove profile

L shaped groove profile fully encased on the side panel. It can be easily placed or removed even if the worktop is on.

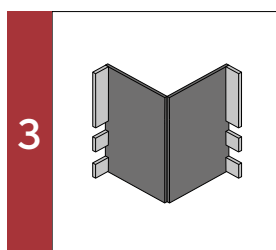

Gola intermedia per basi a cassetti / cestoni

Gola con profilo scavato da utilizzare fra cestoni e cassetti. Nel caso di più basi a cestoni/cassetti accostate la gola intermedia viene fornita in unico pezzo di lunghezza adeguata.

Intermediate groove profile for base units for drawers / deep drawers

Intermediate L shaped groove profile to be used between big drawers and drawers. In case of many base cabinets one close to each other, the intermediate groove profile will be supplied in a whole piece in the proper length.

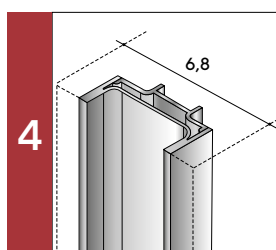

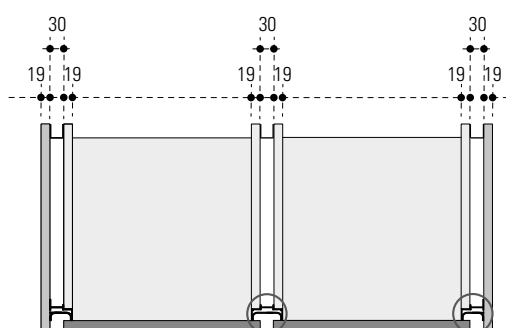

Raccordo angolare

Da utilizzare nelle basi ad angolo per raccordare le due gole sottotop. Solo per angoli interni.

Angular connection

To be used on corner base units as a joint between the two groove profiles. For inner corners only.

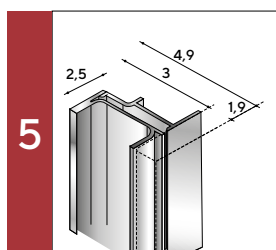

Gola verticale intermedia

Gola con profilo scavato da utilizzare tra due colonne.

Intermediate vertical groove profile

L shaped groove profile to be used between two tall units.

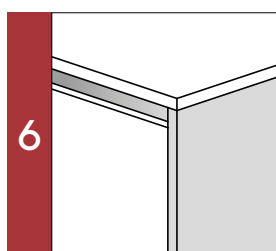

Gola verticale laterale

Gola con profilo scavato da utilizzare con l'ultima colonna della composizione in abbinamento ad un fianco di chiusura di profondità standard.

Lateral vertical groove profile

L shaped groove profile to be used with the last tall unit and matched to an additional closing side panel in standard depth.

Chiusura fianco isola con gola

Additional side closing panel
